Bubble Experiments - 3V
What we used
5 cups of warm water
1 cup washing up liquid
2 teaspoons glycerol
1 bucket
Cut straw to look like fan
Plastic cup

What we did
Mix together.
Use the cut straw and blow into cup
Or dunk cut end of straw into cup and pull out then blow straw quickly
Watch the bubbles

What Happened
Water is needed to help make the bubbles.
The glycerol helped to keep the bubbles longer.
The harder you blew, the more bubbles were made.

DO NOT TASTE THE MIXTURE
IT IS YUKKY
